

Saint Paul Public Schools:

SPPS follows state education guidelines that allow districts to offer e-learning days due to inclement weather. **The district may call a non-instructional day or e-learning day if:**

- Wind chills are forecasted to be -35 or colder at 6 a.m. OR
- Snow makes it too difficult for our students and staff to safely get to school

The Superintendent also reserves the right to close school due to inclement weather or other unforeseen circumstances, if necessary. **Students should take their iPads and chargers home every day to be prepared for the possibility of an e-learning day due to weather conditions.** Please note that delayed start times and early dismissals are not logistically possible in Saint Paul Public Schools.

St. Cloud Area School District No. 742

Grand Rapids Area Schools:

A wind chill of -50° Fahrenheit will be identified for closing schools due to cold weather.

University of Minnesota:

The University considers multiple factors depending on the weather situation. The following categories are broad guidelines used in decision making.

1. **Low air temperatures or wind-chill**

When the immediate forecast calls for air temperatures or sustained windchill at or below -35°F for more than three consecutive hours, between the hours of 6:00 am and 10:00 pm, the campus will consider the need for reduced operations.

2. **Low air temperatures or wind-chill, combined with other hazardous conditions**

When the immediate forecast calls for air temperatures or sustained wind-chill at or below -25°F for more than three consecutive hours combined with a significant snowfall between the hours of 6:00 am and 10:00 pm, the campus will consider the need for reduced operations.
